**Module overview**

In this module students will continue to develop vocal skill, stamina and flexibility in the first semester, building on the core principles of:

- Breath
- Posture
- Tone
- Resonance
- Articulation

Students will also use these sessions to build a repertoire folder of music and text which will prepare students for audition and their transition into the profession. This includes particular vocal technique for recorded mediums, leading to a recorded technical assessment. Again, providing students with resources wholly applicable to their continuing professional development.

In the second semester students will use these sessions to develop vocal skills and exercises directly related to the performance productions at the end of the semester. These sessions will be driven by the productions, their texts, their music or their devising process. As part of this students will also have the opportunity to interrogate the differences between personal vocal development and performance ‘show coaching’, which is appropriate to the industry.

**Aims**

This module is designed to develop students’ abilities to professional levels with regard to their knowledge and understanding the performer’s voice as well as develop particular vocal skills which are particularly prevalent to a professional performer.

The module is also designed to embed professional levels of self-reliance and self-discipline as well as significant abilities in the collaborative behaviours.

This module gives students in all pathways the opportunity to develop vocal skills in relation to their programme productions – linked to modules *Preparation for the Profession – Showcase*, and Group Public Performance.

Students will also receive individual 1:1 tuition (10 hours) throughout the year to receive tailored practical sessions on particular performance techniques in support of the voice strand and accompanying assessments. Semester 1 is concerned with further skills acquisition, semester 2 focuses on coaching in specific skills for the end of semester production.

The module aims to:

1. Further students’ ability to understand anatomy and physiology in relation to voice.
2. Further enable students to develop their bodies as instruments of expression.
3. Link vocal skills acquired to a set of productions in which the student will perform.
4. Explore the difference between continued voice training and specific ‘show coaching’.
5. Establish students’ critical awareness with regard to their personal development and their performance skill in the context of Acting.
6. Establish students’ self-reliance and their ability to collaborate with peers and tutors.

**Learning outcomes**

On successful completion of this module, students will be able to:
1. Support the voice in spoken text and song to a demonstrably high level.
2. Demonstrate vocal development, applying skills developed at Level 4 and 5 to production.
3. Release unnecessary physical and mental tensions and promote efficient use of vocal anatomy and breath, demonstrating advanced physical ability.
4. Demonstrate new knowledge of the voice and its link to developing character and clear appreciation and understanding of that knowledge with regard to performance.

**Learning and teaching methods**

The module will be delivered through practical workshops, technical classes, improvisation sessions, and experiences of a range of acting and performance techniques commonly found in Actor Training and best prepares students for the practical assessments.

**Contact hours and directed study (over semesters 1 and 2)**

<td>Total hours (100hrs per 10 credits)</td>
<td>200 hours</td>
</tr>
</tbody>
</table>

**Opportunities for formative feedback**

Throughout the sessions students will use video of work in classes to allow for tutor and peer feedback throughout the module and allow for improvements to be made as part of on-going personal development, as well as in preparation for final summative assessments. This is also linked to continued formative feedback, fundamental to practical sessions.
